

Clinic Philosophy

The format of the clinic is designed to demonstrate, instruct and reinforce fundamental individual Water Polo skills. These skills will then be incorporated into team tactics, both basic and advanced. Instruction will encourage an examination of the rules of the game. The environment will be energetic and positively charged. The learning will be fast-paced and reinforced with repetition and multi-media reviews. Our goal is to provide each participant with the tools to help make themselves into better players as well as contribute to their teams success.
